A First-Class Deepwater Port: The Port of Brownsville, the only deepwater port located on the U.S. and Mexico border, provides a full range of services to ensure efficient and timely cargo delivery worldwide. With abundant land for development and 17 miles of waterfront access, the Port of Brownsville offers easy access to non-congested international bridge crossings and rail connections to your ultimate destination. At the Port of Brownsville there is no cargo that we cannot handle!

GOVERNANCE

The Port of Brownsville is governed by the Brownsville Navigation District, a political subdivision of the State of Texas. The district is guided by an elected Board of Commissioners who serve 4-year terms. Current Board of Commissioners are:

John Wood, Chairman

John Reed, Vice-Chairman

Sergio T. Lopez, Secretary

Ralph Cowen, Commissioner

Carlos R. Masso, Commissioner

FACILITIES

- Approximately 40,000 acres of land
- 635,000 sq. ft. covered storage
- 3+ million sq. ft. open storage
- 13 cargo docks
- 5 liquid cargo docks

M-10 AND M-69 HIGHWAY DESIGNATION

The Port is part of the M-10 and M-69 Marine Highway corridors. This allows the Port to provide an economical method of transporting cargo with service routes from the Port of Brownsville along the designated marine highways. M-10 and M-69 include the Gulf of Mexico, the Intracoastal Waterway and connecting commercial navigation channels, ports and harbors. M-69 connects to a larger interstate network of marine routes, intersecting with M-146 in Chambers County and linking up to M-10 in Port Arthur, which connects to marine highways in Louisiana and Alabama.

MEXICO IMPORT/EXPORT EXPERTS

The Port of Brownsville provides excellent services to facilitate the international movement of goods between the United States. We have the facilities and the knowledge to handle international cargo efficiently.

LOCATION

The port is located at the southernmost tip of Texas at the westernmost terminus of a 17 mile (27 kilometers) channel that flows into the Gulf of Mexico at the Brazos Santiago Pass. The City of Brownsville is two miles (3.3 kilometers) to the southwest and lies adjacent to the Rio Grande River, providing a convenient gateway via three international bridges to Mexico and beyond.

MAIN CHANNEL DEPTH

The Brownsville Ship Channel has an authorized depth of 42 feet. The Turning Basin has a depth of 36 feet and a width of 1,200 feet.

LAND AVAILABLE FOR DEVELOPMENT

The port owns approximately 40,000 acres (16,187 hectares) of land available for development. Developed and undeveloped sites are available in the port's Turning Basin for cargo facilities, industrial sites, expansion, relocation, manufacturing, greenfield projects, and more.

	2014 CARGO TONNAGE— 7.6 MT	2015 CARGO TONNAGE— 9.1 MT
Liquid Cargo:	3,254,851 MT	3,852,614 MT
Dry-Break Bulk/Steel:	2,993,039 MT	3,683,926 MT
Non-Waterborne Cargo:	925,806 MT	925,779 MT
Pipeline:	454,993 MT	670,606 MT

PRIMARY CARGOES

- **Steel Products:** slabs, coils, plates, beams, iron ore, steel pipe, billets, pig iron, wire rod, ingots, briquettes, chrome ore
- **Liquid Cargo:** lubricants, diesel, gasoline, fuel oil #6, jet fuel, naphtha, wax, vacuum gas oils
- **Breakbulk Cargo:** limestone, asphalt, minerals
- **Other:** grain, barite, bauxite, petroleum coke, aluminum, scrap metals, electrical poles, windmill components, etc.

FOREIGN TRADE ZONE (FTZ) # 62

The Port is the grantee for Foreign Trade Zone # 62 and offers sites at the Port of Brownsville, Brownsville-South Padre Island International Airport, Valley International Airport, Harlingen Industrial Park and Airpark, NAFTA Industrial Park and FINSA Industrial Park at Los Indios. Zone status is available to any of the port's properties. FTZ #62 is ranked in the top 3 in the United States for value of exported cargo. For additional information contact Tony Rodriguez at trodriguez@portofbrownsville.com.

OTHER PORT AREA SERVICES

- Bunkering/fuel
- Construction and refurbishing of offshore drilling rigs
- Domestic and international container service
- Bulk terminaling for miscellaneous liquids
- Ship repairing and dismantling/recycling
- Break-bulk/heavy lift/project cargo
- Steel fabrication, boat construction
- Grain handling and storage
- LPG storage/distribution
- Crane maintenance and repair
- Environmental and waste services
- Marine equipment/supplies
- Towing and tug services

MULTI-MODAL ACCESS

The Port of Brownsville offers multiple modes of transportation which include ocean-going vessels, all major U.S. and Mexican truck lines, rail service, barge service via the U.S. Intracoastal and Inland Waterway System, short-sea shipping via the M-10 Marine Highway, pipeline access to U.S. and Mexican terminals, and air freight service at the Brownsville/South Padre Island International Airport.

OVERWEIGHT CORRIDOR

In order to facilitate the movement of cargo to and from Mexico, the Port of Brownsville in conjunction with the Texas Department of Transportation issues permits online to shippers allowing them to load their trucks to the legal weight limits of Mexico. The permits cover truck movements between the Veteran's International Bridge and the Port of Brownsville via SH 48. This provides the most efficient and cost-effective movement of cargo by trucks to destinations in Mexico. For additional information contact Tony Rodriguez at trodriguez@portofbrownsville.com.

FISHING HARBOR

Located on the north side of the Brownsville Ship channel, about five miles (8.1 kilometers) east of the Turning Basin, is the Fishing Harbor, a very unique asset at the port. It consists of three 14 foot (4.2 meters) deep basins and over 10,000 linear feet (3,280 meters) of docks, which houses up to 500 fishing boats that call the Port of Brownsville home.

BROWNSVILLE & RIO GRANDE INTERNATIONAL RAILWAY (BRG)

The Brownsville & Rio Grande International Railway (BRG) provides efficient and reliable rail service to all businesses at the Port of Brownsville. Operations are 24 hours per day, five days per week. The BRG offers direct interchange with Union Pacific Railroad (UP), Burlington Northern Santa Fe (BNSF) and Kansas City Southern de Mexico (KCSM). KCSM serves as UP's intermediate switch to and from Mexico. For additional information contact Norma Torres, President & COO, at (956) 831-7731, or via email: ntorres@omnitrax.com.

The Port of Brownsville is a dynamic deepwater facility which continues to grow and adapt to ever-changing demands of the global marketplace. The board of commissioners, port director and staff members know the importance of having the Port of Brownsville prepared to meet any challenge. The Port is constantly working to improve and expand not just its infrastructure but most importantly increase employment opportunities in the area.

- Cargo diversification took a significant step forward in 2012 with the movement of windmill components (blades, towers) in addition to other commodities such as petroleum products, steel (plate, slabs, coils), iron, aluminum billets, lubricants oils, and paraffin wax, among others. Today, the Port of Brownsville moves more steel into Mexico than any other port in the United States.
- In 2015 the port opened a new cargo dock, referred to as Dock 16. The new dock enhances the port's expansion in its cargo handling efforts and has the versatility to keep pace with the growing demand for handling multiple commodities. Dock 16 also serves as the port's second heavy-load capacity dock and increase efficiencies by eliminating or minimizing potential vessel delays.
- In response to the growing demand for heavy cargo handling capabilities the port purchased a second mobile harbor crane with a maximum lifting capacity of 125 tons. The addition of the crane improves the port's productivity and enhances its reputation of reliability in handling and moving cargo. In addition to its lifting capacity, the crane also has a maximum radius of 51 meters or 167.32 feet and is powered by an environmentally friendly low-emission diesel-powered generator. The new crane's handling capacity includes dry bulk, heavy lift cargo and containers.
- It is important to mention the expanding liquid cargo business at the Port of Brownsville. A liquid cargo company recently expanded its presence in the port with a new bulk liquid terminal facility. The new facilities began operations in the second quarter of 2016 and will ultimately increase the volume of petroleum products moving through the port.
- Port tenants are expanding their operations and making improvements to their current sites.
- Major capital projects were completed in 2012 such as the Road Improvements Project and the Seafarer Center. Completion of the SH 550 Entrance Canopy project, the new Command and Control Center, and the dock lighting was done in 2013. The port is currently working on the Foust Road Canopy project.

The Port of Brownsville continually strives to maintain its competitiveness and is ready to embrace the future demands of the global market.

GENERAL INFORMATION

The Port of Brownsville offers its customers various modes of transportation to and from the Port, including worldwide ocean-going vessel transport, U.S. and Mexican truck lines, rail service, barge service via the U.S. Intracoastal and Inland Waterway System, pipeline access service, and air service at the Brownsville/South Padre Island International Airport.

Terminal facilities are available at the Port of Brownsville to handle and store liquid bulk commodities. There are five liquid cargo docks complemented by total tank storage capacity of approximately 3.4 million barrels. Railcar and truck loading racks at the various terminals provide for the safe and efficient transfer of petroleum products, chemical products, and edible oils moving into the U.S. and Mexican markets.

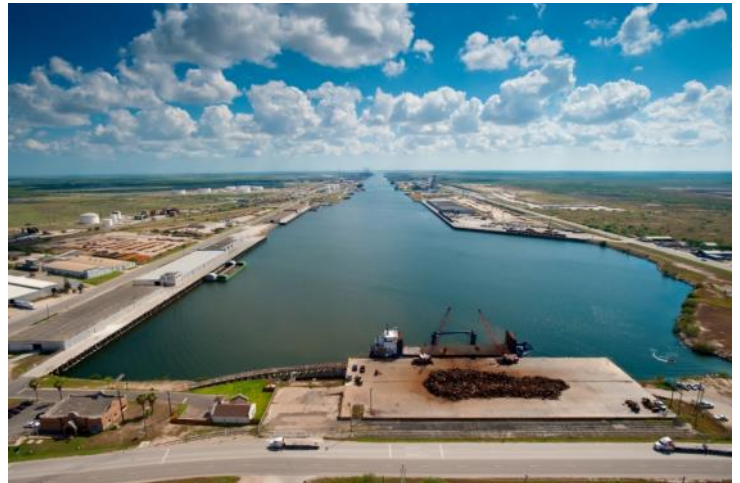

The port owns and operates 10 transit warehouses totaling more than 635,000 square feet of covered storage space. These buildings are adjacent to vessel berths and have aprons and rail track on the landward side. Additionally, there are another 2.85 million square feet of public warehousing available near the docks. Warehouses are located in a secure area.

COMMODITIES HANDLING

The port has several versatile marine terminal operations for both liquid and dry bulk cargo. Chemicals, LPG, clays, petroleum, grain, windmill components, sulfur, steel, bulk minerals, ores, fertilizers and aluminum are some of the leading commodities routinely handled at the port.

HARBOR FACILITIES

The Main Harbor is comprised of the Turning Basin, Turning Basin Extension, and Turning Basin approach, and has almost five miles of improved real estate with water frontage. The Turning Basin is 3,500 feet long, varying in width from 400 to 1,200 feet with Cargo Docks 1 thru 4, 7, 8, 10 thru 13, and 15 for a total of 5,685 linear feet of dock. Liquid Cargo Docks 1, 2, 3, and 5 are located in the Turning Basin Extension which is 7,592 feet long and has a width of 500 feet. The Turning Basin Approach is 15,600 feet long with a bottom width of 300 feet. Various private marine related businesses, i.e. ship repair and ship dismantling yards, as well as Keppel AmFELS, are located on both sides of the Turning Basin Approach.

The Fishing Harbor is five miles east of the Turning Basin and has a protected entrance from the ship channel. The basin measures 2,100 feet by 1,600 feet overall, with two 300 feet x 1,200 ft. peninsulas in the center. The channel connected to the ship channel is 200 feet wide and 600 feet long. This basin has over 10,000 linear feet of dock space for shrimp trawlers, tugs and other small craft. Controlling depth is 14 feet.

GENERAL INFORMATION

The ship channel has no bridges or other obstructions which could interfere with the transit of large vessels. Two rock jetties over 5,000 ft. in length and 1,200 ft. apart, protect the entrance channel. Design depths in feet at mean low water are as follows:

	Design Bottom Width*	Design Depth*
Channel Entrance	300	44
Channel Entrance to Goose Island Passing Basin	250	42
Goose Island Passing Basin to Turning Basin Extension	300	42
Turning Basin Extension	500	42
Turning Basin	1200	36

Vessel Transit times from sea buoy: (estimated)

DOCK 12: Arriving loaded: 2.5 hours

Arriving/Departing light ship: 2.25 hours

Distance 17.5 nautical miles

DOCK 15: Arriving loaded: 2.5—3 Hours

Arriving/Departing light ship: 2.5 hours

Distance 17.5 nautical miles

*Please contact the Harbormaster's Office for limitations or restrictions at (956) 831-8256.

TERMINAL OPERATIONS

All waterfront facilities at the Main Harbor are owned and controlled by the Brownsville Navigation District (BND). Fishing and small craft facilities are leased to private operators, but all deepwater facilities in the main harbor are operated by BND as public facilities. Vessels, upon request from their designated agent, are assigned berths by the Harbormaster's Office at the Port of Brownsville on a first-come, first-serve basis. Stevedores are responsible for coordinating the loading and unloading of cargo from vessels, barges, rail cars, and trucks.

The Harbormaster's office schedules vessel arrivals and departures, assigns berths, maintains radio contact with pilot boat of the Brazos-Santiago Pilots Association, and provides up-to-the-minute information on schedules useful to agents, stevedores, tugboats, line runners, and the general public. Vessels can contact the dispatchers in the Harbormaster's office at (956) 831-8256 or on Marine VHF Radio Channel 16, 24 hours a day.

GENERAL INFORMATION

All general cargo sheds, except Shed No. 2, Dock 15 Warehouse and Dock 15 Warehouse East are equipped with automatic sprinkler systems and hoses. Fire hydrant stations are located on wharf aprons and throughout the port area. Water supply is from two 16" water mains connecting with the City of Brownsville facilities. Storage capacity and pressure equalization are provided by a 500,000 gallon elevated water tank and a one million gallon elevated water tank.

PORT OF BROWNSVILLE POLICE/SECURITY

The Port of Brownsville Police/Security Department provides patrol and surveillance of the public areas at the Port of Brownsville 24/7. The Port Police/Security Department enforces all federal, state and local laws and regulations to maintain a safe and secure environment that promotes uninterrupted Port operations. Officers patrol the waterfront, monitor public facilities and areas, and provide general assistance to port stakeholders.

For additional information contact the Port of Brownsville Police/Security Department at (956) 509-2100.

HOMELAND SECURITY

The regulations implemented by the U.S. Department of Homeland Security in 2006 require that Port security screen every person and vehicle entering the Port. In order to enter the Port of Brownsville visitors are asked to declare the purpose for entering the Port and for a government-issued ID such as a state driver license, a U.S. passport, a VISA laser card, or Residential Alien Card.

Additionally, it is required that credentialed merchant mariners and workers with unescorted access to secure areas of vessels and facilities must present a Transportation Worker Identification Credential (TWIC) card.

For information and online registration on the TWIC card, visit www.tsa.gov/twic. The TWIC Enrollment Center is at **7470 Padre Island Hwy. 48, Brownsville, Texas, 78521**. Pre-registration is strongly recommended.

TERMINAL INFORMATION

The Port owns the following terminals:

<p>Dock No. 1 (General Cargo)</p> <p>Physical address: 4900 Foust Road</p>	<p>Location: North side of Turning Basin Length: 420 feet; Width: 165 feet; Height: 14' 8" Shed: 400 x 120 feet, steel construction, sprinkler equipped, 46,250 sq. ft. Design Depth Alongside: 32 feet nominal* Floor and Aprons: 650 lbs/sq.ft. Shipside Apron: 35" wide Rear Apron: 10 feet wide, double depressed tracks adjacent to dock</p>
<p>Dock No. 2 (General Cargo)</p> <p>Physical address: 5400 Foust Road</p>	<p>Location: North Side of Turning Basin Length: 420 feet; Width: 165 feet; Height: 14' 8" Shed: 400 x 81 ft., steel construction, 32,400 sq. ft. Design Depth Alongside: 32 feet nominal* Floor and Aprons: 650lb./sq. ft. capacity, concrete Shipside Apron: 74 feet wide Rear Apron: 10 feet wide, double depressed tracks</p>
<p>Dock No. 3 (General Cargo)</p> <p>Physical address: 200 S. Windhaus Road</p>	<p>Location: West side of Turning Basin Length: 440 feet; Width: 165 feet; Height: 14' 8" Aprons: 450 lb./Sq. ft. capacity, concrete Design Depth Alongside: 32 feet nominal* Railroad Siding: Double depressed tracks at rear adjacent to dock</p>
<p>Dock No. 4 (General Cargo)</p> <p>Physical address: 4500 Foust Road</p>	<p>Location: North side of Turning Basin Length: 470 feet; Width: 165 feet; Height: 14' 8" Shed: 340 x 120 ft., steel constructions, sprinkler equipped, 40,800 sq. ft. Floor and Aprons: 650lb./sq. ft. capacity, concrete Design Depth Alongside: 32 feet nominal* Shipside Apron: 35 feet wide Rear Apron: 10 feet wide, double depressed tracks adjacent to dock</p>
<p>Dock No. 7 (General Cargo)</p> <p>Physical Address: 6300 Foust Road</p>	<p>Location: North Side of Turning Basin Length: 500 feet; Width: 140 feet; Height: 12' 8" Shed: 480 x 100 ft., steel construction, sprinkler equipped, 47,795 sq. ft. Floor and Aprons: 500lb./sq. ft. capacity, concrete Design Depth Alongside: 27 feet nominal* Shipside Apron: 30 feet wide Rear Apron: 10 feet, double depressed track adjacent to dock</p>

TERMINAL INFORMATION

The Port owns the following terminals:	
<p>Dock No. 8 (General Cargo)</p> <p>Physical address: 6800 Foust Road</p>	<p>Location: North Side of Turning Basin</p> <p>Length: 500 feet; Width: 140 feet; Height: 12' 8"</p> <p>Shed: 467 x 100ft., steel construction, sprinkler equipped, 46,700 sq. ft.</p> <p>Floor and Aprons: 500lb./sq. ft. capacity, concrete</p> <p>Design Depth Alongside: 26 feet nominal*</p> <p>Shipside Apron: 30 feet wide</p> <p>Rear Apron: 10 feet, double depressed track adjacent to dock</p>

TERMINAL INFORMATION

The Port owns the following terminals:

<p>Dock No. 15 (Heavy/Multi-purpose open dock) Port Crane – 100 ton Gottwald - Available Physical address: 12301 R.L. Ostos Road</p>	<p>Location: Southside of Turning Basin Extension Length: 600 feet; Width: 145 feet; Height: 12 feet Sheds: 15 west: 120 x 850=102,000sq. ft./Steel Construction 15 east: 120 x 500=60,000sq.ft./Steel Construction with two overhead cranes with 30 short ton capacity Floors and Apron: 2,500 lbs./sq. ft. Capacity, concrete Railroad Siding: two-rail track siding along warehouse Design Depth Alongside: 42 ft. nominal Storage: 4.1 acres of improved open storage and directly adjacent to dock</p>
<p>Dock No. 16 Heavy/Multi-purpose open dock) Port Crane– 100 ton Gottwald– Available Physical address: 13201 R.L. Ostos Road</p>	<p>Location: Southside of Turning Basin Extension Length: 600 feet; Width: 145 feet; Height: 12 feet Sheds: None at this time Floors and Apron: N/A Railroad Siding: two-rail track siding behind patio Design Depth Alongside: 42 ft. nominal Storage: 4.0 acres of improved open storage and directly adjacent to dock</p>

TERMINAL INFORMATION

The Port owns the following terminals:	
Liquid Cargo Dock Physical address: 500 Liquid Cargo Dock Road	Central Platform: 30 ft. x 60 ft.; construction – concrete and steel “H” pilings, four (4) breasting dolphins each 23 ft. x 25 ft. Design Depth Alongside: 36 feet nominal*
Liquid Cargo Docks Nos. 1, 2, and 3 Physical address: Liquid Cargo Dock No. 1—8200 W. Oil Dock Road Liquid Cargo Dock No. 2—8900 W. Oil Dock Road Liquid Cargo Dock No. 3—12700 E. Oil Dock Road	Location: North side of Turning Basin Extension Length: 420 feet O.A., 120 ft. pier – Height – 14.8 feet Design Depth Alongside: Oil Dock #1 – 33 ft. nominal Liquid Cargo Dock #2 – 31 ft. nominal Liquid Cargo Dock #3 – 30 ft. nominal Construction: Pile and timber “T” head. Liquid Cargo Dock #1 and Liquid Cargo Dock #3 have concrete breasting units; Liquid Cargo Dock #2 has steel pipe pile dolphins Equipment: All docks have hydraulic hose handling cranes.
Dock No. 5 Physical address: 9800 W. Oil Dock Road	Location: North side of Turning Basin Extension Length: Slip: 1,100 ft. Dock: 109 ft. Between moorings: 220 ft. Height: 16’ – 6” Construction: Reinforced concrete Equipment: A hydraulic hose handling cranes Design Depth Alongside: 42 feet nominal
Bulk Cargo (Grain Elevator) Dock Physical address: 10005 R.L. Ostos Road	Location: Southside of approach to Turning Basin Extension Length: 400 ft., 43 feet apron, 12 feet high Construction: Steel pile, concrete deck Equipment: Two (2) 25,000 bu. per hour Buhler gentries; trimmer and spoons; reversible conveyors Depth Alongside: 36 feet nominal*
Fishing Harbor	Location: Four miles east of Turning Basin on Ship Channel Docks: 8657 linear ft. of marginal docks. Three – 40 ft. Finger piers Depth Alongside: 14 feet minimal*. Construction – pile and timbers
Open Storage Areas	Over 2.85 million sq. feet of <u>OPEN PATIO</u> Open Storage areas are available through the Harbor Master’s Office.
