1. CHANGES TO BID FORM:

- a.** The **Bid Form** has been revised to expand the description of Item 4. The new description is: "PROVIDE CRANE FOR HEAVY LIFTING TO ASSIST WITH NEW CRANE INSTALLATION." Also, the unit has been defined as DAY.
- b.** The crane to be provide shall be a barge crane to assist in placing the new crane on the newly installed supports.
- c.** The unit DAY will include use of the barge mounted crane for a 10-hour period on the day of installation of the crane. While it is expected that the crane installation should require only one day, three days of heavy lifting are included in the Bid Form. However, payment shall be made only for the days used.

2. CLARIFICATIONS AND INFORMATION ON BID ITEM 4:

- a.** The Crane Assembly is to arrive at the work site area in two basic components: the Pedestal HPU ("Pedestal") and the crane upper works ("Crane"). The Pedestal weighs approximately 8,000 lbs. The Crane weighs approximately 14,000 lbs.
- b.** The Pedestal and Crane may have to be mobilized by barge to the location.
- c.** The pedestal should arrive prior to the crane. Once it arrives, the pedestal should be bolted to the support structure.
- d.** Once the pedestal is fastened and connected, the Crane can be hoisted and ready to fasten to the Pedestal with Techcrane supplied bearing hardware. There is a 3-Pass procedure that must be completed prior to load test. However, once the Crane is bolted to the Pedestal with the first full pass, it may be disconnected from the yard crane for the final two passes. All three passes should be performed by qualified personnel.
